

Clarity English: Clear Pronunciation

Clear Pronunciation is the beginning of your English-speaking journey. It helps learners recognise and pronounce the forty-three (43) sounds of English through audio, video, and interactive activities.

You can choose from three models: Australian, British or North American English, watching and listening to native speaker examples from those backgrounds.

Please note that Clear Pronunciation must be used on a computer or a phone that has a microphone to do the activities.

Introduction

The first time you log into Clear Pronunciation, a video will pop up. Watch the video to understand all these questions and their answers to be ready for the course.

Press Play (the white triangle) to start the video.
