

LOTE4Kids App Guide

LOTE4Kids gives your child the chance to have story-time in any language, anywhere. LOTE stands for Languages Other Than English. There are over 100 world languages on LOTE4Kids.

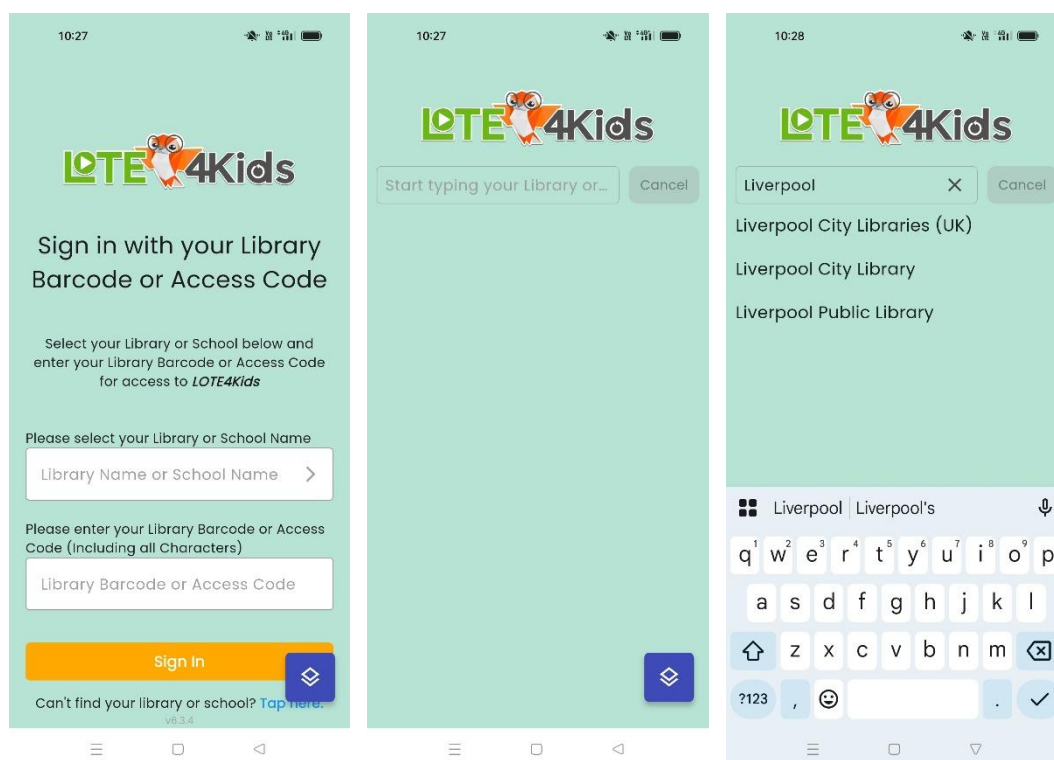

Your child can read and learn in your language. You can also improve your child's bilingual skills. Each book has an English translation. This helps children learn languages with multilingual reading and listening skills. All languages found in our multicultural collection are also in LOTE4Kids.

Please note: this guide uses an Android phone. This means it may look different on other phones. It will still work the same way.

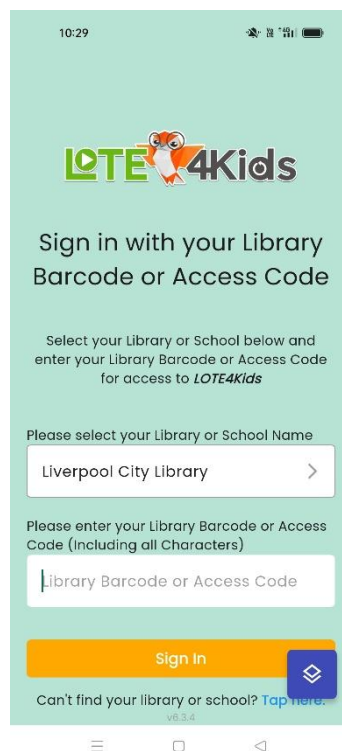

Logging in

To use [LOTE4Kids](#), download the app. Android phones and tablets users should download from [Google Play](#). iPhone or iPad users should download from the [App Store](#).

Tap **Library Name or School Name** and then tap **Start typing your Library**. Type and choose **Liverpool City Library**. Do not use the UK or Public Library, these will not work with your library card.

You will need to type your library card number where it says **Library Barcode or Access Code**. This starts with 2000. If you are an online member, your number starts with C. Click on **Sign In**.

Finding a language

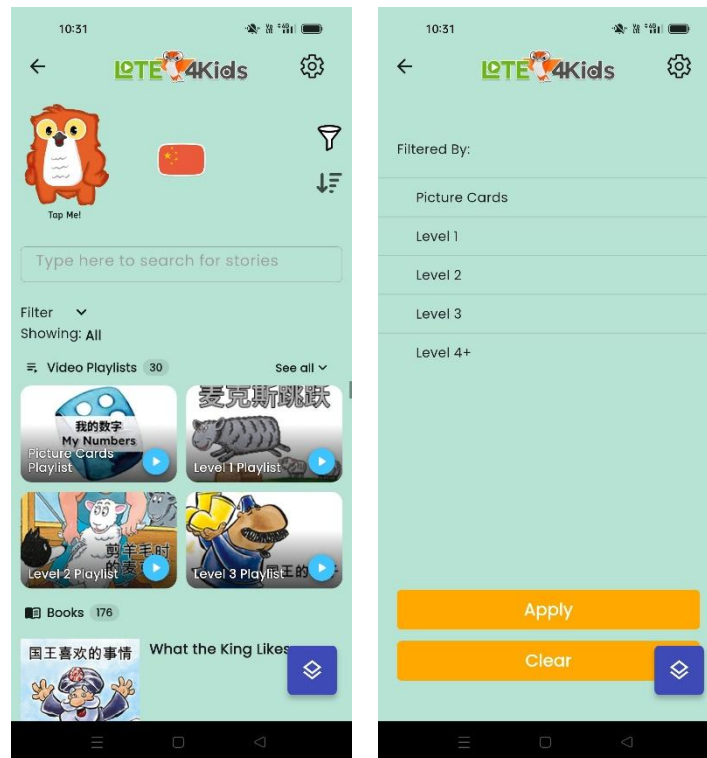

From the home page, you can search for a language in the search bar.

All languages have a flag, the traditional spelling, and an English translation.

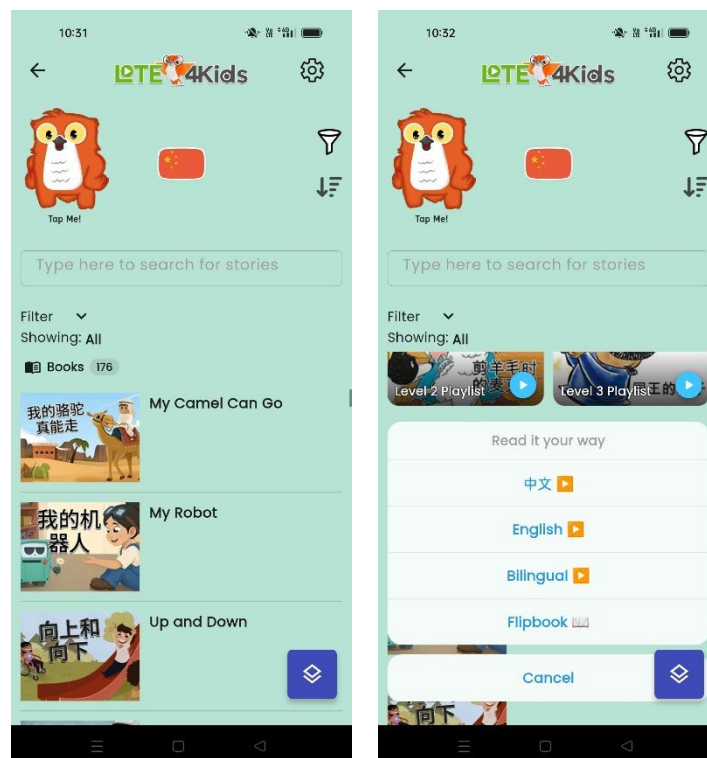

Click on the flag to find all titles in that language.

You can use the filters to sort through the titles. There are different levels, and sometimes there are educational resources. The titles are in both languages.

Some titles will offer a Bilingual option. This will read the story out in both languages.

Click on the language you want to read in.

English only books

On the home page, there are three flags for Australia, UK, and America. These are English only books spoken in different accents.

Click on the accent you want, and it will provide a list of books.

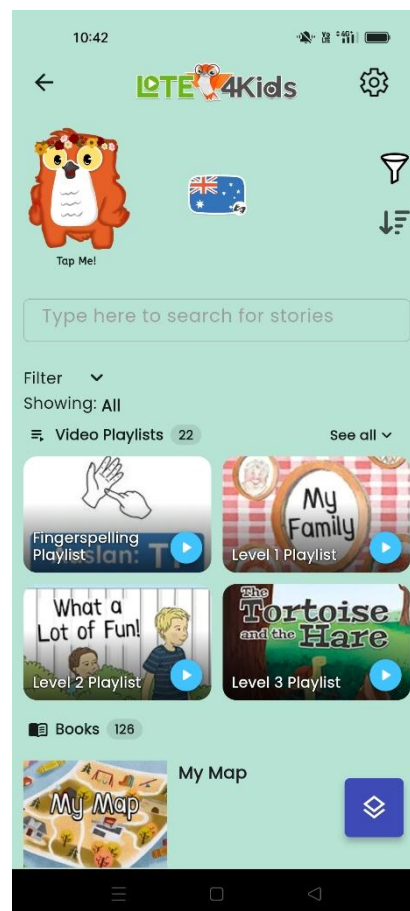

Select your book to open the video.

Auslan Stories

Sign language stories are found with the rest of the languages on the home page. Australian sign language is Auslan.

It has finger-spelling resources and story-times.

Reading

With most books, you will read the book through a video.

The videos will look like an open book, taking up the main part of the page.

There will be a description of the book if you scroll past the video.

Press the Play button in the middle of the video to start it. You can also slow the video or speed it up by clicking the three dots in the bottom right-hand corner.

If you choose a flipbook, you control when you turn the page.

Press the flag to play the words spoken on that page. If there is a bilingual option, it will show the American flag as well. Use the arrows to turn the pages back and forth. The circle arrows start the book again. The arrows pointing out to a square make the book larger.

Click on the new square to change it back.

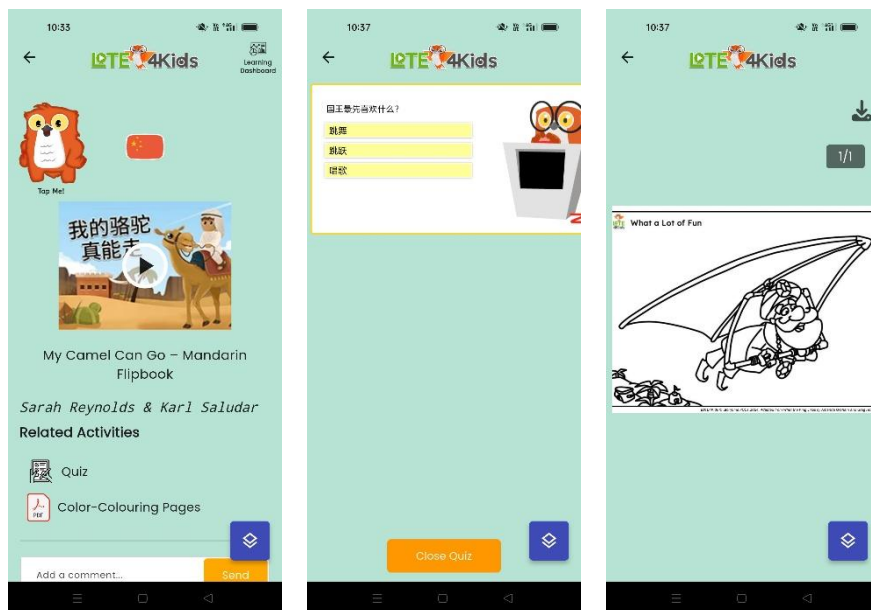

Related Activities

When you are reading a book or doing an activity, there are Related Activities under the book. These change for each book or activity.

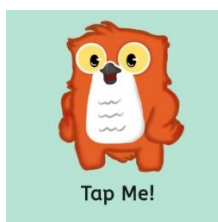

You can click on any of these to go to them.

Related Activities help you think about the book you are reading. Clicking on them makes different things happen. They might bring up a box over the screen that asks you questions about the book or they might open up to a new page that give you more information or activities to do.

Avatar

At the top of the home page or language pages, you will see an Avatar. It says **Tap Me!** under the avatar.

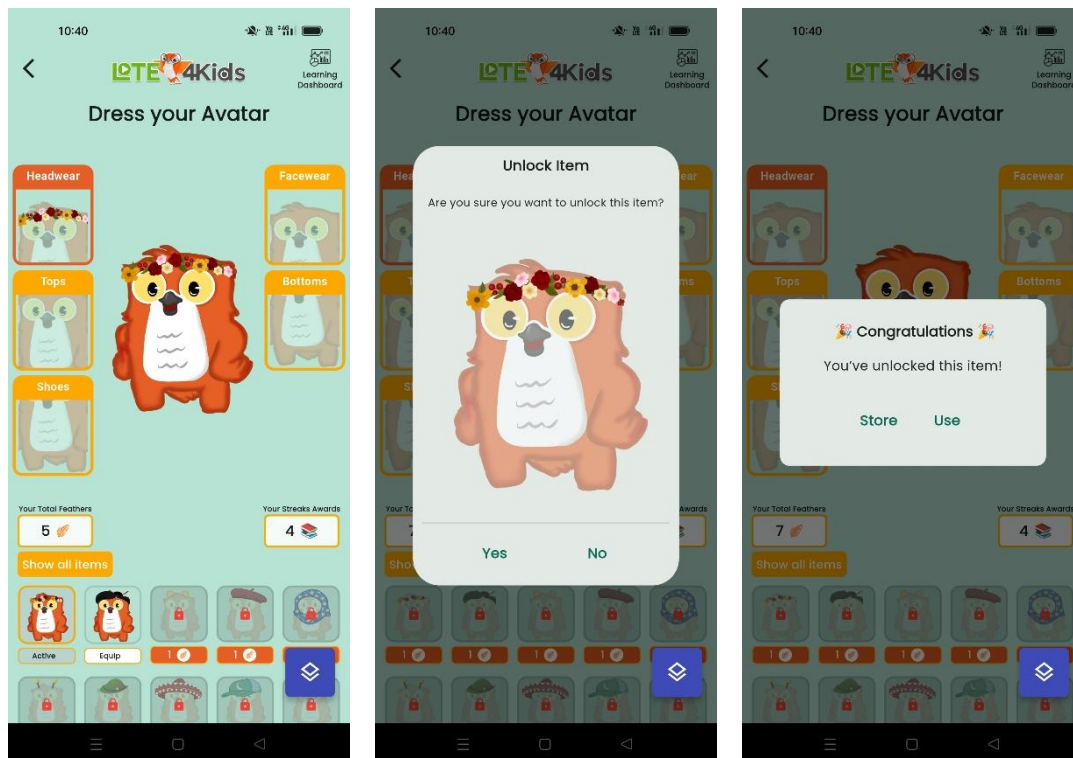

The more you interact with books and activities, you will earn feathers. You can use these feathers to 'buy' decorations for the owl avatar of LOTE4Kids and dress them up.

This is not synced with your browser avatar. This means that you earn points on the app for the app avatar, and points on the browser for your browser avatar.

Active means the avatar is already wearing this item. Equip means you can wear it without spending feathers. If it is locked, you will see how many feathers it will cost to unlock it so you can wear it.

Click the item you want to wear to change it. If you are buying the item, it will ask if you are sure you want it. Click **Yes**.

It will then let you wear it by clicking on Use it, or add it to the list of what you own for your avatar with Store.

Accessibility

On the bottom right of most pages, you will see two white diamonds on a blue background. This will move with you as you scroll through the page.

Click on this to find the accessibility options. This helps people who have trouble seeing or reading the website.

- Increase text to make the text bigger.
- Decrease text to make the text smaller.
- Grayscale to make the website black and white.
- High contrast to change the website's colours to high contrast.
- Reset to change any of these settings back to the default.
